# Entrance contest

Write an app to display a calculator with add, subtract, multiply and divide buttons. The calculator should work as a normal calculator.
In addition, it will have a memory button which when clicked will show the following table:

| Operand1 | Operand2 | Operator | Result |
|----------|----------|----------|--------|
| 7 | 2 | ADD | 9 |
| 9 | 5 | SUBTRACT | 4 |
| 9 | 2 | ADD | 11 |

These values should be stored in a coredata table called "Operations"
